

Oceans are part of your world.

Keep them Clean.

A single piece of trash in the street, miles away from the ocean can easily become marine debris. Once it enters a storm drain, it is eventually carried down stream all the way to our oceans.

Help the ocean by creating less waste. Reduce the amount of disposable products you buy. Reuse what you do buy and recycle everything possible.

Did you know?

It is estimated that billions of pounds of litter is put into our oceans each year.* This trash comes from rivers and streams that lead to the ocean. Below is a list of objects that have been discarded into our oceans.

See if you can find them all!

N	B	A	B	I	H	O	S	E	A	T	M	R	G
